

PETER MUELLER

EcoVapor Recovery Systems, LLC

Peter Mueller is a petroleum engineer with extensive experience in operations, management, regulatory matters, and entrepreneurial ventures.

He graduated from the Colorado School of Mines in 1978 and worked in drilling, completions, production, marketing, and midstream facilities domestically and internationally, both for major oil companies and independents.

He also served as Chairman of the Colorado Oil and Gas Conservation Commission during the 2000's. In 2009, Peter and his son Hans, also a CSM graduate, founded EcoVapor Recovery Systems with a mission to reduce waste of natural gas and flaring in Colorado. EcoVapor was recently recognized by Shell Oil as a key component in their flaring reduction program and continues to grow in multiple states across the US.

He is serving as an Executive in Residence for the CU GEM program and as a Mentor in the Denver Petroleum Club's 2019 Mentor Program.

Peter and his wife, Deborah, have lived in Colorado since the '70's and have raised their two children, Hans and Blair, here. Peter enjoys both alpine and Nordic skiing, mountain and road biking, sailing, and traveling internationally. His charitable work is focused on Colorado's Children's Hospital and the Denver Rescue Mission.
