

Ron Gusek

Liberty Oilfield Services

Over the past 20 years, Ron has garnered extensive oil and gas experience in North America, and extended his knowledge of operations through travels to Asia, Russia and the Middle East. Ron is the President at Liberty Oilfield Services, where his focus includes new technology and innovation, supply chain, efficiency and optimization and external relations. He has also held previous roles at Sanjel Corporation, Zodiac Exploration, Pinnacle Technologies and BJ Services, with a primary focus on hydraulic fracturing in unconventional reservoirs.

Ron's is a published SPE author and presenter. His dedication to the petroleum engineering community and interest in shared industry knowledge is evident in his numerous volunteer capacities, including past roles with SPE and as co-chair of a committee to develop an industry recommended practice for hydraulic fracture stimulation for western Canada.

Ron holds a B.Sc. in Mechanical Engineering from the University of Alberta and is a registered professional engineer with APEGA.

DPC Director: 2017-present
